

Member-only Access Program

This program is for membership-based organizations seeking to provide member-only benefits.

We can set up your Tools so that only the Business Formation and Business Incentives sections of the Tools are visible to the general public, with all other parts of the Tools, accessible through your membership portal.

The public sees the different topics in the Tools, but cannot access them. Instead, they are given a message to contact you for membership.

If you do not have a membership portal, we can create one for you. To do this, we will need an excel worksheet with your members' email addresses.

If you have a membership portal, you just need to put the Tools button on the pages inside that portal. You will also need to put a button on the public part of your website so that people can reach the Business Formation and Business Incentives information.

There is no charge for setting up member-only access, and you can change it at any time.
