

Small Communities Program

This program is for communities with population 25,000 or less that do not have local agencies or organizations to partner with.

In this program, you can partner with another small community in any part of the country and reduce your annual Tools subscription by \$800.

Here's how it works:

1. You find another small community that is interested in hosting the Tools. The community does not have to be in your state, but it must be a small community with population 25,000 or less. You need to do legwork to get them to sign up for the Tools. We can provide demos to support that effort, but you need to be the lead.
2. You and your partner each get customized Tools sites. The cost for each of you is reduced by \$800, as long as each of you remains in the program.
3. If either partner leaves, the other may find another partner to re-qualify for the program.
4. The setup fee for each remains at the full fee because we are creating separate sites for each of you.

If you do have local partners, here are our other programs:

- 1) If the community is right-next-door and you want to share one site, you can share one subscription.
- 2) If the community is right-next-door, or you have overlapping locations, we can duplicate the site for a partner with a customized header, but the same content and resources. For duplicate sites with different headers, the cost is one subscription, plus two setup fees.
